PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable, production-grade web and mobile applications using the MERN stack. Proven expertise in designing real-time systems, event-driven architectures, and end-to-end feature ownership. Hands-on experience integrating Large Language Models (LLMs) and building Agentic AI solutions — including an AI-powered CRM assistant and auto-translation features using Google Gemini. Passionate about leveraging AI to automate workflows and enhance user experiences.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript
Frontend	React.js, React Native, Electron.js, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs
Databases	PostgreSQL, SQL, Redis
Messaging	RabbitMQ, BullMQ, Apache Kafka
Real-Time	Socket.IO, WebRTC
AI / LLM	Agentic AI, AI Agents, Prompt Engineering, Meta Prompts, Context Engineering, MCP Tools, Google Gemini API
Tools	Git, GitHub, Postman, VS Code

WORK EXPERIENCE

Software Developer

Jan 2023 – Present

eSparkBiz Technologies • Ahmedabad, India

- Led end-to-end feature development across multiple client projects — from requirement gathering and analysis to implementation, QA, and production validation.
- Built a full CRM Automation Module from scratch, architecting real-time data pipelines using Socket.IO, RabbitMQ, and Apache Kafka for high-throughput workflow processing.
- Developed an AI-powered CRM Assistant using Agentic AI principles, enabling end users to perform complex CRM operations via natural language interactions.
- Integrated Google Gemini API to implement an auto-translation feature that automatically translates incoming messages into the user's native language in real time.
- Engineered a multi-platform Chat Application (similar to Slack/Cliq) with a React web app, React Native mobile app, and Electron.js desktop app from a unified codebase.
- Implemented real-time communication features using Socket.IO and WebRTC for instant messaging, notifications, and video/audio capabilities.
- Designed and optimized PostgreSQL schemas and Redis caching strategies to improve query performance and reduce latency in high-traffic scenarios.
- Mentored junior developers, conducted code reviews, and drove best practices across the team for maintainable and scalable code.
- Diagnosed and resolved production incidents for live users, reducing downtime through rapid root-cause analysis and hotfix deployments.

KEY PROJECTS

CRM Platform with AI Automation

- Designed and built a CRM automation module from scratch, enabling no-code workflow creation for business operations.
- Used Apache Kafka & RabbitMQ for async event processing; Socket.IO for real-time UI updates without page refresh.
- Built an Agentic AI assistant allowing users to query, update, and manage CRM data via a conversational interface.

Multi-Platform Chat Application (Web + Mobile + Desktop)

- Architected a Slack/Cliq-style messaging app across React (web), React Native (iOS/Android), and Electron.js (desktop).
- Implemented real-time messaging, channel management, and notifications using Socket.IO and WebRTC.
- Maintained shared business logic and API contracts across platforms to ensure feature parity and minimal duplication.
- Integrated Google Gemini API for multilingual auto-translation of incoming messages for international users.

EDUCATION

Master of Computer Applications (MCA)

2021 – 2023

Sardar Patel University, Vallabh Vidyanagar, Anand, Gujarat

CORE COMPETENCIES

Full Stack Development • Agentic AI Integration • LLM Prompt Engineering • Real-Time Systems • Event-Driven Architecture • Cross-Platform Development • Feature Ownership • Team Mentoring • Production Debugging • System Design
